Scheduled and managed quarantine reports.

## Key Benefits

- ✓ Integrated network perimeter email protection to stop spam before it reaches the inbox.
- ✓ Ensuring integrity of business communications and users only receive the email that want to get.
- ✓ Increasing employee productivity by reducing the noise created by spam.
- ✓ Effortless email group filtering policy setting including group policies to cater for all types of employees and roles.
- ✓ Threat Centre's around-the-clock protection.
- ✓ Integrated disaster recovery option offers access to email at all times.
- ✓ Sophisticated email Data Loss Prevention (DLP).
- ✓ Rapid setup without service interruptions.
- ✓ Free up IT resources and reduce costs.
- ✓ Solution is provisioned and managed by a certified Managed Service Provider of Manage Protect.

## Key Features

### 1 Feature-rich and reliable email spam and virus protection

- » Based on a patented method of identifying and controlling spam using a voting algorithm to achieve more than 99% accuracy to successfully block destructive messages from entering the business environment.

### 2 MPmail content and attachment filtering

- » Automatically identifies and blocks unwanted, inappropriate or malicious content in body copy and attachments before it enters or leaves an organisation.

### 3 Secure message encryption

- » Secures communications, protects confidential business information and prevents data leaks.

### 4 Sophisticated quarantine management

- » Ensures emails are filtered and suspect messages are stored in a safe, external quarantine for 90 days on behalf of the business based on pre-set compliance rules. MPmail's effortless quarantine management enables business users to determine how items captured by the filter should be handled in the future.

### 5 Continuous email access

- » Business users can continue to communicate from existing email addresses with integrated webmail during email outages. This is made possible through MPmail's Message Continuity protocol which maintains a rolling 90-day email storage of all emails sent and received.
