

Simple, Secure, Microsoft 365 Backup.

Backup365

Backup365 provides peace of mind that business data is safeguarded against loss and available for future retrieval if it is ever needed, ensuring there are no interruptions to business operations.

Feature rich management portal.

While Microsoft is responsible for keeping Microsoft 365 running, each and every organisation is responsible for their data.

Data backup is crucial to any business continuity plan.

Backup365 enables businesses to function during disruptive events and the ability to recover following an incident.

Backup365 performs regular snapshot backups of all cloud business data multiple times a day and saves it to local data centres in Australia.

Backed up data cannot be deleted, is easily searched, accessed and restored by an IT provider or administrator using the Backup365 portal. The same functions can also be completed by a user via the Backup365 portal or the Outlook Add-in for both Mac and PC.

Key Features

Backup365 automatically discovers and continuously backs up all Microsoft 365 mailboxes, SharePoint sites and OneDrive accounts.

- 1 Supports Exchange Online, SharePoint, OneDrive and Teams
- 2 Ensures businesses meet their data loss prevention, data protection and recovery responsibilities or specific industry regulations
- 3 Snapshot backups captured multiple times a day and never overwritten
- 4 Data is stored in AWS Australia, independent to Microsoft
- 5 Backed up data cannot be deleted, and is stored for 10 years*
- 6 Data search and restore at granular level
- 7 Outlook Add-in enables users to search and restore messages or a full mailbox into their own mailbox

* Extension on 10 years is by request

Data is safeguarded against loss.

Last Sync	
Success Rate	100%

Detailed customer reporting.

Key Benefits

- ✓ Backed up data is stored in Australian data centres, independent of Microsoft. Businesses can be confident data is safe and accessible, even in the case of Microsoft service downtime.
- ✓ The Service Guarantee is assurance that if you find a mailbox or a site which was agreed to be backed up isn't completed within the last 48-hour period due to a system issue, Backup365 will refund the service fee for that month.
- ✓ Backup365 helps businesses save money by allowing the removal of Microsoft 365 mailboxes when outgoing staff members depart, while ensuring the data can be retrieved if or when needed.
- ✓ Confidence and peace of mind that data is safeguarded against loss.
- ✓ Protection from unintended user deletion of email, calendar, tasks or malicious deletion.
- ✓ Solution is provisioned and managed by a certified Managed Service Provider of Manage Protect.
