

Web Filtering Service.

MPweb

MPweb is a comprehensive web filtering solution which can replace or enhance a business's existing security infrastructure for improved protection against viruses, spyware, phishing attacks as well as stem inappropriate web use.

MPweb is a cloud-based security solution that proactively prevents communication between your network and web-based threats.

Key Features

MPweb secures business networks, ensures businesses meet compliance rules and stay productive.

- 1 Internet access control**
 - » Businesses who direct their DNS traffic to MPweb can monitor all DNS requests from clients to block responses for sites associated with malware, phishing, and botnets, while allowing requests for safe sites to proceed.
- 2 Visibility and management**
 - » MPweb's powerful rule engine to facilitate user, group and account level access and set policies across email, web and email archive through a single console.
- 3 Real-time forensic reporting**
 - » Real-time logs display which sites and downloads business users have attempted to access and whether or not they were permitted.

Key Benefits

- ✓ Keep networks secure by preventing known and unknown viruses, phishing and malware attacks before they reach your network.
- ✓ Maintain business productivity by measuring and managing internet abuse, non-work related website use and downloads.
- ✓ Ensure business users meet compliance rules by restricting access to inappropriate, illegal and offensive sites by category and file types.
- ✓ Lower cost of ownership with no hardware or software purchase or maintenance required.
- ✓ Scalable and reliable service level agreements to ensure uptime.
- ✓ Fault-tolerant Australian and APAC data centres eliminate single point-of-failure risk.
- ✓ DNS-based filtering means all computers using same IP are protected.
- ✓ Integrated anti-spyware protection.
- ✓ Web address filtering and file or content type blocking to prevent unwanted content.
- ✓ Internet use policies set at either group or user level.
- ✓ Detailed real-time and scheduled reporting.
- ✓ Support for Citrix & Terminal Services.
- ✓ Solution is provisioned and managed by a certified Managed Service Provider of Manage Protect.
